Amazon India products: pricing, discounts and ratings
Based on 1,181 distinct product listings (1,351 products, including colour/size variants)

Distinct product listings	1181
Average discount (%)	46.3
Average rating (out of 5)	4.08
Listings with fewer than 100 ratings (rating unreliable	71
Price-premium listings flagged for review	24
Robust value picks	24

What we found
Deeper discounts go with slightly lower ratings. The pattern is weak but consistent, and clearest for items under ₹2,500.
Discounting depends heavily on product type: about 14% for office products against about 66% for wearables.
Listings priced between ₹500 and ₹2,500 typically attract the most customer ratings.

11 listings rated 4.5 or higher have fewer than 100 ratings, so their scores are too uncertain to trust.
Low-rated products have about 3× as many negative review titles as high-rated ones (14% against 5%).

How to read this
The number of ratings is used as a stand-in for sales volume.

The file holds up to 8 sample reviews per product, while the rating count shows the real volume.
These are patterns in the data, not proof that discounts cause lower ratings.

Prices are a snapshot from about early January 2023, judging by timestamps in the product links.

Discount band vs Rating

Discount band	Listings	Average rating	From (%)	Up to (%)
0 to 19%	149	4.17	0	20
20 to 39%	260	4.13	20	40
40 to 59%	416	4.07	40	60
60 to 79%	290	4.04	60	80
80% or more	66	4.00	80	101

Typical popularity by price bucket

Price bucket (INR)	Listings	Median ratings per listing
Under 500	443	2523
500-1,000	221	5556
1,000-2,500	279	6355
2,500-10,000	172	3618
10,000+	66	6297
